January

Revision of 4th Periodic Test

Note: Annual Syllabus includes the Syllabus of all 4 Periodic Syllabuses.

Note: Conduct ASL as per school guidelines.

Engaging ASL Topics for Class 9

- *The Role of Artificial Intelligence in Education*
- *Social Media: Boon or Bane?*
- *The Impact of Smartphones on Teenagers*
- *Future of Technology: Are We Alone?*
- *Environment & Society: Climate Change and Its Impact*
- *The Importance of Recycling and Waste Management*
- *Population Explosion and Its Repercussions*
- *The Importance of Local Tourism*
- *Importance of Mental Health*
- *Benefits of Healthy Eating and Balanced Diet*
- *The Role of Sports in Student Life*
- *The Power of Positive Thinking*
- *The Importance of Time Management*
- *The Benefits of Reading Books*
- *The Influence of Peer Pressure*
- *Importance of Having a Hobby*
- *Tips for Successful ASL Presentation*
- *Structure: Ensure a clear introduction, body, and conclusion.*
- *Preparation: Research the topic to have concrete examples and statistics.*
- *Interaction: Be ready to discuss the topic with your partner or answer examiner questions confidently.*
- *Tone: Maintain a clear, audible voice and confident posture.*

Learning outcomes

Literature

KAVERI

HOW I TAUGHT MY GRANDMOTHER TO READ Students will be able to -

- summarize the story in their own words.
- identify the main characters and settings.
- analyze the theme of determination and lifelong learning.
- interpret the grandmother's feelings before and after learning to read.
- appreciate the value of literacy and education at any age.
- reflect on respect for elders and the role of family support.

BHARAT OUR LAND

Learning outcomes

Students will be able to-

- identify the poet Subramanian Bharati and his contribution to Indian literature.
- recall the main ideas and message of the poem.
- explain how the poet expresses pride in India's culture, heritage, and unity
- Describe the themes of patriotism, unity in diversity, and national pride.
- analyze the use of poetic devices such as imagery, repetition, and rhythm
- Interpret the emotional tone and message conveyed in the poem
- Relate the poem's ideas to present-day India
- Develop a sense of patriotism and respect for the nation
- Appreciate India's cultural diversity and unity
- Reflect on their role as responsible citizens.

Suggested Activities

How I Taught My Grandmother to Read

- Teach Someone to Read or Write

Pick a family member (grandparent, helper, or younger sibling) and teach them basic reading or writing. Even helping them read a newspaper or simple story can make a big difference.

- Start a **“Learning Together” Journal**

Role Reversal Activity

Let the learner (like a grandparent) teach you something they know (cooking, storytelling, traditions). This builds respect and bonding.

Letter Writing Practice

Encourage writing short letters or messages to relatives. This improves writing skills and emotional expression.

BHARAT OUR LAND

Suggested Activities

Express patriotism through actions

How to achieve:

Students should be encouraged to show love for the country not just in words but through honest behavior, hard work, and respect for others.

Develop pride in cultural heritage

How to achieve:

Students should be motivated to explore Indian literature, music, festivals, and traditions. Share and celebrate them with others.

3. THE POT MAKER

Learning outcomes

By the end of the lesson, students will be able to-

- Identify the author Temsula Ao and the setting of the story
- Recall the main events and character
- Explain the life and struggles of the pot maker
- Describe the theme of dignity of labour and simplicity
- Analyze the character of the pot maker and his values
- Interpret the message about hard work, self-respect, and contentment
- Summarize the story in their own words
- Appreciate the importance of traditional skills and craftsmanship
- Develop respect for all types of work
- Reflect on simple living and honest earning

THE POT MAKER

Suggested Activities

- o **Diary Entry:** Write a diary entry from Sentila's perspective detailing her feelings about learning to make pots despite the challenges.
- o **Character Analysis:** Create a character map for example exploring why Mesoba and Arenla were hesitant or supportive of Sentila's dream. No
- o **Alternative Ending:** Write a new ending for the story focusing on whether Sentila successfully revives the art.
- o **Class Debate: Discuss:** "Are traditional crafts becoming extinct due to industrialization?"
- o **Storytelling:** Narrate the story from the perspective of an elderly villager who has seen generations of potters.
- o **Clay Modeling:** Try making a small, simple pot using clay to experience the "tap-tap" technique described.
- o **Poster Making:** Create a poster highlighting the value of handmade products over factory-made items
- o **Who Am I?" Vocation Riddles (Writing/Speaking):** Students create riddles about different professions (similar to the farmer, potter, mason, or cook mentioned in the chapter), focusing on the skills and tools used in each.

Note: Any other suitable activity can also be conducted

Gifts of Grace: Honouring our Vocations

Learning outcomes

- By the end of the lesson, students will be able to-
- Identify the central idea of the lesson
- Recall key examples used to explain the concept of vocation
- Explain the meaning of "vocation" and how it differs from just a job or career
- Describe how personal talents and interests relate to one's life purpose
- Analyze how individuals can discover and develop their vocation
- Interpret the message about using one's gifts meaningfully
- Relate the ideas in the lesson to their own life goals
- Appreciate the importance of recognizing and nurturing one's abilities
- Develop a sense of responsibility toward using their talents for the good of society
- Reflect on personal strengths and future aspirations

Gifts of Grace: Honouring Our Vocations

Suggested Activities

Vocation Spotlight" Interviews: Students can interview local workers (electricians, carpenters, farmers) about their craft, aligning with the poem's focus on the diverse, skilled work of ordinary people.

Creative Project: Inspired by the line that a vocation is our "identity," participants can create a portfolio (a photo, song, or essay) showcasing how their hobbies or future career goals reflect their personality.

Role-Playing Daily Workers:

Acting out scenes from the poem, such as a cook (preparing food with "delicious singing") or an artisan working with "myriad hues".

Reflective Writing: "Gifts of Grace": Writing a poem or paragraph about a person who has inspired them through their honest work, celebrating the beauty of their dedication.

These activities aim to promote respect for all types of labour and recognize that every worker contributes to the vibrant spirit of a community.

3. WINDS OF CHANGE

CANVAS OF SOIL

Learning outcomes

By the end of the lesson, students will be able to-

- Identify the central theme and key ideas of the lesson
- Recall important details and examples presented in the text
- Explain how change influences personal growth and self-discovery
- Describe the symbolic meaning of "canvas of the soul"
- Analyze the use of imagery, symbolism, and reflective tone
- Interpret the message about embracing change and inner transformation
- Express their own thoughts through short reflections or writing
- Appreciate the importance of adapting to change in life
- Develop self-awareness and emotional understanding
- Reflect on their own experiences of change and growth

WINDS OF CHANGE

Suggested Activities

- **Wind Chimes Craft:** Create wind chimes from recycled tin cans, shells, or keys to make wind-activated music.
- **Kite Flying & Building:** Construct handmade kites using paper, straws, and ribbons to explore wind resistance.
- **Project work** on different types of Pankha (fans)

Canvas of Soul

Suggested Activities

Soil Color Study: Collect soil samples from different locations and analyze their colors. Discuss why they differ (e.g., high organic matter makes soil darker, iron makes it red).

Garden Journaling/Photography: Document the changes in a garden, taking pictures or sketching the plants as

4. Vitamin - M

LEARNING OUTCOMES

At the end of the chapter students should be able to understand

- the value of fostering empathy for the elderly.
- their need for autonomy over protection.
- to recognize that Vitamin- M (Memory, mental, stimulation) is symbolic of love and companionship.
- Students learn to analyze intergenerational relationships and appreciate the wisdom of elders.

Vitamin - M

Suggested Activities

Practice Active Listening: Students should be encouraged to show genuine interest in what the elderly people say, ensuring they feel heard rather than ignored.

Social Interaction: Students should be encouraged to ensure that the elderly people have regular, light-hearted conversations to foster a sense of belonging and companionship

Understanding Themes: Grasp the core theme that elderly individuals value independence, self-respect, and emotional connection over constant supervision.

Analyzing Characters: Evaluate the characters of Grandpa (clever, independent) and Ravi (curious, protective), and understand that appearances of forgetfulness can be misleading

I CANNOT REMEMBER MY MOTHER

LEARNING OUTCOMES

At the end of the chapter students learn to understand

- that a mother's love is eternal and transcends physical presence.
- Students learn to appreciate that emotional bonds remain strong even if direct memories are faint.
- Identify the poet Rabindranath Tagore and the theme of the poem
- Recall key images and lines from the poem
- Explain the poet's feelings of longing and emotional connection with his mother
- Describe how memories and imagination keep loved ones alive
- Analyze poetic devices such as imagery, symbolism, and repetition
- Interpret the emotional tone and deeper meaning of the poem
- Express personal responses through speaking or writing
- Develop sensitivity toward family relationships and emotions
- Appreciate the role of memory and love in human life
- Reflect on their own bond with family members

I CANNOT REMEMBER MY MOTHER

Suggested Activities

Sensory Mapping Activity: Identify how Tagore uses scent (Shiuli flowers), sound (lullaby tunes), and sight (blue sky) to evoke memories of his mother. Project work can be given on this topic.

Memory Scrapbooking: Encourage students to create a collage or journal page representing the three main sensory memories described in the poem: the playing tune, the scent of *Shiuli* flowers, and the view of the vast sky.

5. The World of Limitless Possibilities

Nine Gold Medals

Learning outcomes

Students will be able to understand:

- that true success is not just about winning
 - the real victory comes from humanity, kindness, and compassion, not just finishing first or collecting medals.
 - Team spirit and unity matter
 - The athletes demonstrate that supporting others is more important than individual achievement.
 - Helping someone else succeed can be the greatest achievement.
 - Empathy and kindness define character
 - Everyone deserves dignity and respect
 - The lesson emphasizes that people with disabilities are equally capable of courage, determination, and greatness.
 - Cooperation over competition

- “Limitless possibilities” doesn’t just mean personal success—it means creating a world where everyone progresses together.

The World of Limitless Possibilities

Suggested Activities

Embrace Resilient Mindsets: Reframe personal setbacks or "disabilities" as unique strengths

Cultivate Creativity: Students should be guided to practice open-mindedness and engage in diverse, new experiences

NINE GOLD MEDALS

Suggested Activities

Character Sketch: Write a short Parha on the athlete who stumbled and why he felt frustration, as well as on the other athletes' actions

Poster Designing: Create a poster based on the theme of "Sportsmanship and Togetherness" for the Special Olympics.

Any other suitable activity can be conducted.

6. TWIN MELODIES

A FRIEND FOUND IN MUSIC

At the end of the chapter, students will be able to understand that-

- Music can bring individuals together, even if they come from different backgrounds or have never met before.
- Friendship is built on shared feelings and interests, not on language, culture, or distance.
- Music becomes a medium through which characters express emotions that words sometimes cannot convey.
- Others’ feelings and connect with them on a deeper level.
- Music can create strong and meaningful bonds between people.
- People with differences can live in harmony and create something beautiful together.

TWIN MELODIES

Suggested Activities

Role Play & Script Reading: The class should be divided into groups to enact the scenes. Students should focus on portraying the tension between Shruti and her father, and the supportive nature of her friends.

Fusion Project: Research and create a small presentation on famous Indo-Western fusion artists (like Shankar-Ehsaan-Loy or fusion bands) to understand how different styles blend.

Students should be encouraged to write character sketches also.

A FRIEND FOUND IN MUSIC

Suggested Activities -

Musical Drawing/Art: Listen to a piece of music together and draw or paint what you feel, then share your interpretations.

Song Writing: Attempt to write a simple song together based on a shared experience or a story from your lives.

CARRIER OF WORDS

WORDS

At the end of the chapter, students will be able to learn the responsibility in using words.

- It teaches that words should be used carefully and respectfully, as they can either heal or hurt people.
- They will be able to learn the importance of those who carry messages (like postmen or other carriers of words) in connecting people across distances.
- They will be able to learn the value of written expression
- It emphasizes how letters and written words preserve feelings and memories, making communication meaningful and lasting.
- Emotional connection through words
- Words help build relationships and emotional bonds, even when people are far apart.
- The lesson encourages respect for individuals whose work may seem simple but is essential for society, like those delivering messages

Suggested Activities

Writing Tasks

Drafting a Letter or a Message: Write a letter to a family member or a letter sharing happy news (like a promotion or wedding)

Drafting Replies: Based on the text, act as a "literate villager" and draft a polite reply for a villager who has received a complicated letter.

Creative and Project-Based Activities

Create a "Daakroom": Conceptualize a, "Daakroom" (post room) in the classroom, where students create and decorate their own letters or messages etc.

Philately Corner (Stamp Collection): Encourage students to start a small, personal collection of postage stamps and learn what the pictures represent.

FOLLOW THAT DREAM:

Follow that Dream

Believe in Yourself

Learning outcomes

At the end of the chapter students will be able to learn the importance of self-belief.

The lesson teaches that confidence in oneself is the first step towards success. Without believing in your abilities, it is difficult to achieve your goals.

- They will be able to learn the value of Courage to dream big
- It encourages us to set high goals and follow our dreams, even if they seem difficult or unrealistic at first.

Suggested Activities

Start a Dream Diary: Use a notebook to document your passions and keep track of evolving goals, just as the author recommends sustained, long-term dedication.

Create a Vision Board: Students should be guided to use short images, quotes, and symbols to create a physical board representing their long-term goals. This can be done in the form of Project work.

Role-Playing Daily Workers: Acting out scenes from the poem, such as a cook (preparing food with "delicious singing") or an artisan working with "myriad hues".

Reflective Writing: "Gifts of Grace": Writing a poem or paragraph about a person who has inspired them through their honest work, celebrating the beauty of their dedication.

These activities aim to promote respect for all types of labour and recognize that every worker contributes to the vibrant spirit of a community.

BELIEVE IN YOURSELF

Suggested Activities

Reflect on Past Successes: A "win journal" should be maintained by the students to track small and large accomplishments, reminding themselves of their competence.

Physical Movement: Regular exercise and healthy habits release endorphins, which improve mental clarity and self-esteem.

BLUEPRINT OF MARKS DISTRIBUTION

For Mid Term and Annual Examination

Section A – Reading Skills

I. Reading Comprehension through Unseen Passage

– 20 Marks (10+10)

- Descriptive/ Discursive Passage – 400-450 words – 10 Marks
- Case Based Passage (With verbal/ visual inputs – statistical data/ chart etc.) 200 - 250 words – 10 Marks

Total Length of the two passages to be 600-700 words.

Question types to be included: Selected and constructed responses (MCQ's, Objective type, VSAQs, SAQs)

Section B – Writing Skills and Grammar

– 30 Marks (10+20)

II. Grammar

– 10 Marks (04+03+03)

- Sequence of Tenses in different contexts of communication
- Modal Auxiliaries and their functions in expressing ability, obligation, permission, possibility and advice

- Reported Speech in extended texts including
 - statements
 - questions
 - commands and requests
- Conditional Clause – Type 1
- Subject-Verb Concord
- Determiners
- Clauses – Noun Clause, Relative Clause

- | | |
|---|------------|
| 3. Editing/Omitting (Selected responses – MCQs) | – 04 Marks |
| 4. Sentence Rearrangement | – 03 Marks |
| 5. Sentence Transformation | – 03 Marks |

III. Writing Skills **– 20 Marks (03+05+05+07)**

- | | |
|--|-----------|
| 6. Writing a Notice, Informal Invitation (Word Limit – Up to 50 words) | – 3 Marks |
| 7. Writing a Letter to Editor, Formal E-mail on a given issue for presenting views and suggestions –(Word Limit – 120-150 words) | – 5 Marks |
| 8. Writing a Factual Description, Magazine Article (Word Limit – 120-150 words) | – 5 Marks |
| 9. Writing Descriptive, Narrative Essay (Word Limit – 200-250 words) | – 7 Marks |

Section C – Language through Literature **– 30 Marks (10 + 10 + 05 + 05)**

- | | |
|--|------------------|
| IV. Extract Based Questions | – 5x2 = 10 Marks |
| 10. One extract out of two, from Drama / Prose. | |
| 11. One extract out of two, from poetry. | |
| Types of questions to be included – Selected and constructed responses (MCQs, Objective Type Questions, VSAQs) | |
| V. Constructed Responses (Short & Long Answer Questions) | |
| 12. Five out of Six Questions to be answered in 40-50 words. | 5x2 = 10 Marks |
| 13. One out of two Questions assessing extrapolation beyond the text and across the texts to be answered in about 120-150 words. | 5 Marks |
| 14. One out of two Questions assessing theme / plot/ character to be answered in about 120-150 words. | 5 Marks |

हिंदी पाठ्यक्रम (2026-27) (R1/R2)

कक्षा - नवीं

भाषा किसी भी ज्ञान-क्षेत्र की आधारशिला है। हम प्रकृति और समाज को बहुत हद तक अपनी भाषा के ढाँचे के माध्यम से ही समझते और विश्लेषित करते हैं। इस कार्य को करने में भाषा का साहित्य हमारी विशेष सहायता करता है। माध्यमिक स्तर पर प्रवेश करने वाले विद्यार्थी सामान्य भाषा-ज्ञान से विशिष्ट अनुशासनात्मक अध्ययन की ओर बढ़ते हैं।

राष्ट्रीय शिक्षा नीति 2020 और विद्यालयी शिक्षा हेतु राष्ट्रीय पाठ्यचर्या की रूपरेखा 2023 की दृष्टि के अनुरूप यह पाठ्यक्रम हिंदी को केवल एक विषय नहीं बल्कि अनुभवों, मूल्यों, बहुसांस्कृतिकता, सृजनात्मकता और संवाद की एक समृद्ध प्रक्रिया के रूप में प्रस्तुत करता है। यह ज्ञान के संग्रह तक सीमित नहीं रहता बल्कि विद्यार्थियों को सोचने, कल्पना करने, विश्लेषण करने और अभिव्यक्ति के लिए प्रेरित करता है। पाठ्यक्रम का लक्ष्य विद्यार्थियों की चेतना को इस दिशा की ओर ले जाना है कि हिंदी भाषा के माध्यम से यथार्थ को अर्थवान जो भी घटित हो रहा है, उसे समझा जाए और उसमें अपनी आकांक्षाओं का चित्र रचा जाए। इस पाठ्यक्रम का केंद्रीय उद्देश्य पाठों का पठन-पाठन मात्र नहीं बल्कि उनके माध्यम से विद्यार्थियों में गहन पाठानुभूति, संवेदनशील अभिव्यक्ति, तार्किक विश्लेषण, संदर्भ-आधारित लेखन तथा भाषिक एवं सांस्कृतिक विविधता की समझ को विकसित करना है। हिंदी भाषा के सीखने-सिखाने के माध्यम से विद्यार्थियों में भाषा, संस्कृति का समावेशी दृष्टिकोण पैदा करना, जीवन के विविध संदर्भों को समझना, विविधता के प्रति सकारात्मकता का बोध पैदा करना- यह सब आवश्यक रूप से अपेक्षित है।

नवीं कक्षा में प्रवेश करने वाले विद्यार्थी की भाषा-शैली और विचार-बोध का एक ऐसा आधार बन चुका होता है कि अब उसे उसके भाषिक दायरे के विस्तार और वैचारिक समृद्धि के लिए आवश्यक संसाधन मुहैया कराए जाने की आवश्यकता होती है। माध्यमिक स्तर तक आते-आते विद्यार्थी किशोरावस्था में प्रवेश कर चुके होते हैं और उनमें सुनने, बोलने, पढ़ने, लिखने एवं समझने के साथ-साथ आलोचनात्मक दृष्टि विकसित होने लगती है। उनमें भाषा के सौंदर्यात्मक पक्ष, कथात्मकता, गीतात्मकता, समाचार-पत्रों की समझ, शब्द-शक्तियों के बीच अंतर की समझ, राजनैतिक चेतना एवं सामाजिक चेतना का विकास हो जाता है। वे आस-पड़ोस की भाषा और आवश्यकता के अनुसार उपयुक्त भाषा-प्रयोग, शब्दों के सुविचारित प्रयोग, भाषा की नियमबद्ध प्रकृति आदि से परिचित हो जाते हैं। इतना ही नहीं, वे विभिन्न विधाओं और अभिव्यक्ति की अनेक शैलियों से भी परिचित हो चुके होते हैं। अब विद्यार्थियों का अध्ययन आस-पड़ोस, राज्य-देश की सीमा को लाँघते हुए

वैश्विक क्षितिज तक फैल जाता है। इन विद्यार्थियों की दुनिया में समाचार, खेल, फिल्म तथा अन्य कलाओं के साथ-साथ पत्र-पत्रिकाएँ और अलग-अलग तरह की पुस्तकें भी प्रवेश पा चुकी होती हैं।

एनसीईआरटी के पाठ्यक्रम और पाठ्यपुस्तकों में आर1 और आर2 के संदर्भ एनसीएफ-एसई 2023 के परिप्रेक्ष्य पर आधारित सांकेतिक और प्रासंगिक हैं। इन संदर्भों का उद्देश्य माध्यमिक स्तर पर आर1 और आर2 के बीच किसी भी प्रकार का संरचनात्मक या योग्यता-आधारित अंतर दर्शाना नहीं है।

पाठ्यपुस्तक की विषयवस्तु, अधिगम परिणाम और मूल्यांकन माध्यमिक स्तर पर आर 1 और आर 2 के लिए परिकल्पित सामान्य योग्यता ढाँचे के अनुरूप हैं, इसलिए संदर्भों के अनुसार इन पाठ्यपुस्तकों का लचीले ढंग से उपयोग किया जा सकता है।

इस स्तर पर हिंदी का अध्ययन-अध्यापन साहित्यिक, सांस्कृतिक और व्यावहारिक भाषा के रूप में कुछ इस तरह से हो कि माध्यमिक स्तर तक पहुँचते-पहुँचते यह विद्यार्थियों की पहचान, आत्मविश्वास और विमर्श की भाषा बन सके। आवश्यकता इस बात की है कि विद्यार्थी भाषा के लिखित प्रयोग के साथ-साथ सहज और स्वाभाविक मौखिक अभिव्यक्ति में भी सक्षम हो सकें। वे हिंदी की प्रकृति के अनुसार वर्तनी और उच्चारण के आपसी संबंधों को समझ सकें ताकि उनकी लिखित और मौखिक भाषा में समानता एवं स्पष्टता हो।

CG-1: लेखन के विभिन्न रूपों (निबंध, पत्र, लेख, चर्चा, साक्षात्कार, सार्वजनिक भाषण) और नव मीडिया (ईमेल, श्रव्य और दृश्य सामग्री) के माध्यम से प्रभावी संप्रेषण के लिए भाषा का उपयोग करना।

दक्षताएँ	सीखने के संकेत बिंदु/गतिविधियाँ
C-3.1-विभिन्न श्रव्य और लिखित सामग्री का विश्लेषण और मूल्यांकन करना।	- विभिन्न प्रकार की श्रव्य और लिखित सामग्री में विवरणों का अवलोकन और विश्लेषण करके उन्हें व्यवस्थित रूप से लिखते हैं। - किसी एक विषय पर विभिन्न स्रोतों से प्राप्त सामग्री का विश्लेषण करके उसकी विश्वसनीयता की जाँच करते हैं।

दक्षताएँ	सीखने के संकेत बिंदु/गतिविधियाँ
C-3.2-रचना में परिवेश का सावधानीपूर्वक मूल्यांकन करके उचित तर्कों के साथ चर्चा-परिचर्चा करना।	पाठ्यवस्तु को पढ़ते और सुनते समय स्वयं के पूर्वाग्रहों को पहचानते हैं और साथियों का मूल्यांकन करके पाठ्यवस्तु/श्रव्य-सामग्री की विश्वसनीयता का निर्धारण करते हैं।

पाठ्यचर्या CG-4: भारतीय भाषाई विविधता से जुड़ी साहित्यिक और सांस्कृतिक विरासत की सराहना करना।

दक्षताएँ	सीखने के संकेत बिंदु/गतिविधियाँ
C-4.1-पाठ को पढ़ते हुए विभिन्न शैलियों की सामग्री के अवलोकन के माध्यम से भारतीय समाज और साहित्यिक विविधता की बहुभाषी प्रकृति की पहचान करना।	भारतीय समाज की बहुभाषी प्रकृति को पहचानने के लिए विभिन्न क्षेत्रीय भाषाओं के चलचित्र और वृत्तचित्र देखते हैं और उनके बारे में अपने विचार साझा करते हैं।
C-4.2-भारतीय भाषाओं की विभिन्न साहित्यिक रचनाओं में निहित संस्कृति एवं विरासत की विविधता और उनके आपसी संबंधों की सराहना करना।	- पढ़ी गई साहित्यिक रचनाओं को विषयों, पात्रों और परिस्थितियों के आधार पर अपने व्यक्तिगत अनुभवों/जीवन से जोड़ते हैं। - विभिन्न भारतीय भाषाओं के साहित्य की विशिष्टता और साहित्य जगत में उनके योगदान की सराहना करते हैं।
C-4.3-हमारी संस्कृति और पहचान के निर्माण में भाषा की भूमिका को समझते हुए अभिव्यक्त करना।	- भाषा में निहित सांस्कृतिक परंपराओं से प्रभावित कहावतों/लोकोक्तियों/मुहावरों के उदाहरण साझा करते हैं। - लिखने और बोलने में सांस्कृतिक परंपराओं से प्रभावित अपनी भाषा की शब्दावली का संदर्भों के अनुसार उपयुक्त उपयोग करते हैं।

| 2. क्या लिखूँ? | पदुमलाल पुन्नालाल बख्शी |
| 3. संवादहीन | शेखर जोशी |
| 4. ऐसी भी बातें होती हैं (लता मंगेशकर से साक्षात्कार) | यतींद्र मिश्र |
| 7. मैं और मेरा देश | कन्हैयालाल मिश्र 'प्रभाकर' |
| निर्मल जीत सिंह सेखों (साथ-साथ पढ़ें) | रा.शै.अ.प्र.प. |

काव्य खंड

- | | |
|------------------------------|-----------------------------|
| 8. पद | रैदास |
| 9. राम-लक्ष्मण-परशुराम संवाद | तुलसीदास |
| 10. भारति, जय, विजयकरे! | सूर्यकांत त्रिपाठी 'निराला' |

व्यावहारिक व्याकरण

1. उपसर्ग और प्रत्यय
2. संज्ञा, सर्वनाम, विशेषण और क्रिया
3. अर्थ की दृष्टि से वाक्य-भेद
4. अलंकार: (शब्दालंकार- अनुप्रास, यमक, श्लेष)

रचनात्मक खंड

1. अनुच्छेद-लेखन
2. पत्र-लेखन
3. संवाद-लेखन
4. सूचना-लेखन

परियोजना कार्य- लेखक 'प्रेमचंद' और भक्त कवि 'रैदास' का साहित्यिक परिचय सचित्र तैयार कीजिए।
(अन्य पाठों पर भी परियोजना कार्य करवाए जा सकते हैं।)

पाठ्यक्रम: वार्षिक परीक्षा के लिए अक्टूबर से फरवरी तक (द्वितीय सत्र)

गद्य खंड

- | | |
|---|---------------|
| 4. ऐसी भी बातें होती हैं (लता मंगेशकर से साक्षात्कार) | यतींद्र मिश्र |
| 5. आखिरी चट्टान तक | मोहन राकेश |

काव्य खंड

- | | |
|--|----------------------|
| 11. झाँसी की रानी | सुभद्रा कुमारी चौहान |
| 12. घर की याद | भवानीप्रसाद मिश्र |
| तब याद तुम्हारी आती है (साथ-साथ पढ़ें) | रामनरेश त्रिपाठी |

परियोजना कार्य- 'झाँसी की रानी' अथवा 'हमारा घर' विषय पर एक सचित्र परिचय तैयार कीजिए।
(अन्य पाठों पर भी परियोजना कार्य करवाए जा सकते हैं।)

वार्षिक परीक्षा में पूर्व पढ़ाए गए पाठों से भी प्रश्न पूछे जाएँगे।

अपठित बोध, व्यावहारिक व्याकरण एवं रचनात्मक खंड में यथावत पाठ्यक्रम ही होंगे।

डी.ए.वी.पब्लिक स्कूल्स, बिहार - प्रक्षेत्र

अनुप्रयुक्तव्याकरणम् (25 अङ्काः)

अर्धवार्षिक / वार्षिकपरीक्षायै पाठ्यक्रमाः :-

5. संधिकार्यम् :-

3

स्वरसंधि :- यण्, अयादि, पूर्वरूप

व्यञ्जनसंधि :- जश्त्व संधि, म स्थाने अनुस्वारः

विसर्गसंधि :- उत्त्वम्, विसर्गस्य सत्वम्

6. कारक-उपपद- विभक्तयः –

3

द्वितीया – उभयतः, धिक्, परितः, समया, निकषा, प्रति, विना

तृतीया – सह, साकम्, सार्धम्, विना, अलम्, सदृश, हीनः

चतुर्थी – रुच्, दा(यच्छ), नमः, कुप्, स्वस्ति

पञ्चमी – विना, बहिः, भी, रक्ष, ऋते

7. शब्दरूपाणि :-

3

अकारान्तपुलिङ्गः :- पितृवत्, राजन्, भवत्, विद्वस, गुणिन्,

स्त्रीलिङ्गशब्दाः - धेनुवत्, मातृवत्, नदीवत्
नपुंसकलिङ्गशब्दाः - फलवत्, वारि, जगत्, मनस्, चक्षुष्
सर्वनामशब्दाः - तत्, इदम्, किम् (त्रिषु लिङ्गेषु)

8. धातुरूपाणि :-

3

परस्मैपदिनः - पठ्, गम्, वद्, भू, क्रीड्, नी, दृश्, शक्, ज्ञा, अस् (पञ्चलकारेषु)

आत्मनेपदी :- सेव्, लभ्, रुच् (लट्, लृट्, लोट्लकारेषु)

उभयपदी - कृ, पच्, नी, कृष् (केवलं लट्लकारे)

9. प्रत्यय :- त्वा, तुमुन्, ल्यप्, क्त, क्तवत्

3

10. समासाः - तत्पुरुष-विभक्ति, नञ्,

3

11. संख्या :- 1-50 केवलं प्रथमा विभक्तौ

3

12. वर्णानां उच्चारणस्थानानि

2

13. अव्ययपदानि :-

2

स्थानबोधकानि - अत्र, तत्र, अन्यत्र, सर्वत्र, यत्र

कालबोधकानि :- यदा, तदा, सर्वदा, एकदा, पुरा,

प्रश्नबोधकाः - किम्, कुत्र, कति, कदा, कुतः

अन्यानि :- च, अपि, यदि, तर्हि, यथा, तथा,

व्यञ्जनसंधि :-तुकागम्
विसर्गसंधि :- रत्व संधि

कारक-उपपद- विभक्तयः -

षष्ठी विभक्ति - उपरि, अधः, पुरतः, पृष्ठतः, निर्धारेण
सप्तमी विभक्ति :- स्निह्, निपुणः, विश्वस्, पटुः

शब्दरूपाणि :- (पुं) :- बालकवत्, साधुवत्, कविवत्,
स्त्री.- लतावत्, मतिवत्,
नपुं.- फलवत्, वारि,
सर्वनाम् :- अस्मद्, युष्मद्

धातुरूपाणि :-

परस्मैपदिनः -कृ, दा, क्री, श्रू पा (पञ्चलाकरेषु)
आत्मनेपदी :- मुद्, वृध् (लट्, लृट्, लोट्लकारेषु)
उभयपदी - ह, भज् (केवलं लट्लकारे)

प्रत्ययः - शतृ, शानच्

समासाः - उपपद्, कर्मधारय

संख्या - 51-100

अव्ययपदानि :-

स्थानबोधकानि -एकत्र, उभयत्र
कालबोधकानि :-अधुना, अद्य, श्वः ह्यः
प्रश्नबोधकाः- कथम्, किमर्थम्,
अन्यानि :- सम्यक्, एव, तु

खण्ड 'घ' पठितांशावबोधनम् :-

अष्टमः पाठः - अत्राद् आनन्दं प्रति
नवमः पाठः - कृतं प्रतिकृतं भूयादेष धर्मः सनातनः
दशमः पाठः - णमो अरिहन्ताणम्
एकादशः पाठः - वर्णोच्चारण - शिक्षा 2

जनवरीमासे वार्षिकपरीक्षायै सम्पूर्णपाठ्यक्रमानां सम्यक्प्रकारेण पुनरावृत्तिः करणीया ।

DAV PUBLIC SCHOOLS, BIHAR ZONE

Syllabus: Class IX

Subject - Mathematics

<i>Chapter</i>	<i>Topics to be Covered</i>	<i>Competencies</i>	<i>Periods</i>	<i>Activities</i>
Orienting yourself: The use of Coordinate	Brief history of Coordinate Geometry, 2-D Cartesian system, Distance between two points, Midpoint of line segment	Locates points in Cartesian plane, identifies coordinates of given points, calculates distance between two points, finds midpoint of a line segment, applies coordinate geometry in problem solving	6	Worksheet
Introduction to linear Polynomials	Algebraic expressions, Definition of a polynomial, Degree of a polynomial, Introduction to linear polynomials and applications, exploring linear patterns, modelling linear growth and linear decay, Linear relationships, Visualizing linear relationships, Slope and y-intercept of a line $y = ax + b$	Understand algebraic expressions; Define polynomial; Identify degree & coefficients; Model growth/decay; Identify patterns; Understand slope & intercept; Graph linear equations; Apply computational thinking	16	Graph plotting
The world of Number	Introduction to rational numbers, Representation of rational numbers on the number line, Density of rational numbers and its proof, Finding rational numbers between any two rational numbers Decimal, representation of rational numbers, Introduction to irrational numbers, Proof of irrationality of $\sqrt{2}$ and $\sqrt{3}$. The square root spiral	Understand rational numbers; Represent on number line; Understand properties; Explain density; Compute decimal expansions; Understand irrational numbers; Prove irrationality; Construct square root spiral; Apply computational thinking for representation and reasoning	12	Number line activity, square root spiral
Exploring Algebraic Identities	Revisiting algebraic identities, Visualizing identities using geometrical models, Factorization of algebraic expressions using identities More identities and their applications, Visualizing factorization of quadratic expressions through algebra tiles and without using algebra tiles, finding new identities Simplifying rational expressions	Visualize identities; Factor expressions; Interpret quadratic forms; Simplify rational expressions; Apply step-by-step computational strategies	15	Algebra tiles
Predicting What Comes Next: Exploring Sequences & Progressions	Introduction to sequences, Explicit or general rule of a sequence, Recursive rule of a sequence, Arithmetic Progressions (AP): nth term, visualizing an AP, and practical contexts leading to APs, Sum of the first n natural numbers Geometric Progressions (GP): nth term, visualizing a GP, and practical contexts leading to GPs	Understand sequences; Identify patterns; Write recursive & explicit rules; Generate terms; Identify AP & GP; Compute nth term; Visualize graphically; Apply in fractals; Solve Tower of	17	Tower of Hanoi puzzle

<i>Chapter</i>	<i>Topics to be Covered</i>	<i>Competencies</i>	<i>Periods</i>	<i>Activities</i>
	Applications of GP in fractals, Tower of Hanoi puzzle	Hanoi; Use computational thinking		
I'm Up and Down, and Round and Round	Practical applications and uses of circles, Definitions related to a circle — Centre, diameter, and radius, Chords and the angles they subtend, Midpoints and perpendicular bisectors of chords Distance of chords from the Centre Subtended angles by an arc Cyclicity of points	Define circle terms; Construct circumcircle; Apply chord properties; Solve angle relations; Identify cyclic figures; Apply logical reasoning	16	Circle activity
Measuring Space : Perimeter and Area	Perimeter of shapes, Perimeter of a circle: Introduction to Pi and its irrationality, Length of an arc, Area of shapes: rectangles, parallelograms, and triangles Heron's formula, Squaring a rectangle: Proof from Boudhayan's Sulbasutras Area of a circle: derivation, Area of the sector of a circle, Brahmagupta's formula for area of a cyclic 4-gon, Heron's formula as a special case of Brahmagupta's formula	Compute perimeter; Understand π ; Calculate arc length; Apply Heron's formula; Solve area problems; Understand generalization	14	Circle Activity
The Mathematics of May be: Introduction to Probability	Concept of probability and randomness, the probability scale Empirical probability: analyzing statistical data and performing experiments, Theoretical probability: sample space and events, representing probability through tree diagrams and tables.	Understand randomness; Estimate probability; Compute theoretical probability; Use tree diagrams; Apply computational thinking	12	Dice/coin activity
Revision	Revision of all chapters covered up to August for the Half-Yearly Examination			Worksheet
Half-yearly Examination	Syllabus of Half yearly Exam: Chapters covered up to August			

Course Structure for the Half-yearly Examination, 2026 – 2027:

Unit	Unit Name	Chapter Name	Marks
I	Number System	Number System	12
II	Algebra	Introduction to Polynomials, Sequences and Progressions, Exploring Algebraic Identities	25
III	Coordinate Geometry	Coordinate Geometry	08
IV	Geometry	Circle	12
V	Mensuration	Area and Perimeter	17
VI	Statistics and Probability	Probability	06
Total	—	—	80

NOTES: “Students of Class IX may opt for Advanced Mathematics as an optional subject. The examination will be conducted for 25 marks with a duration of 1 hour.

The curriculum includes the following topics:

Half – Yearly Examination (Advance Mathematics):

- 1) Sets 2) Logarithms 3) Coordinate Geometry

DAV PUBLIC SCHOOLS, BIHAR ZONE

SCIENCE (086)

Classes IX (2026-27)

Science Education helps students to develop an understanding of the natural and physical world through systematic inquiry. Learning Science also develops important capacities, such as observation, questioning, analysis, inference, etc. The NEP 2020 and NCF-SE 2023 envision science classrooms that encourage curiosity, creativity, collaboration and connection with the real world, ultimately nurturing not just future scientists, but responsible, informed and critically thinking citizens.

The **Curricular Goals (CGs) and Competencies (Cs)** of Science Education designated in Class – IX are as following:

CG 1: Explores the world of matter, its interactions, and properties at the atomic level.

CG 2: Explores the physical world around them, and understands scientific principles and laws based on observations and analysis.

CG 3: Explores the structure and function of the living world at the cellular level.

CG 4: Explores interconnectedness between organisms and their environment.

CG 5: Draws linkages between scientific knowledge and knowledge across other curricular areas.

CG 6: Understands and appreciates the contribution of India through history, and the present time to the overall field of Science including the disciplines that constitute it.

CG 7: Develops awareness of the most current discoveries, ideas, and frontiers in all areas of scientific knowledge in order to appreciate that Science is ever evolving and that there are still many unanswered questions.

CG 8: Explores the nature of Science by doing Science.

SYLLABUS – IX (2026 – 27)

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES & ACTIVITIES
APRIL	Exploration: Entering the World of Secondary Science	
APRIL & MAY	Chapter – 2 Cell: The Building Block of Life (No. of Period – 12) - Discovery of cell - Plant and animal cells - Prokaryotic and eukaryotic cells - Cell as a structural and functional unit of life; structure and function of key organelles (nucleus, mitochondria, chloroplast, endoplasmic reticulum, vacuoles, plasma membrane, cell wall) - Permeability of cell membranes - Cellular division and cancer - Recent advancement in cell biology	- Differentiate between plant and animal cell, prokaryote and eukaryote. - Describe the structural and functional features of cells. - Explain the role of cells in the structure and functions of organisms. - Explain activities inside the cell and its interactions with the environment. - Demonstrate osmosis in cells. - Prepare slides to observe cell structure. - Differentiate between diffusion and osmosis. - Explain the role of cell division mitosis and meiosis in creating similarities and variations. - Identify and describe the role of biomolecules in the structure and function of cell. - Cite case study related to the use of science in human life, for example, Leigh Syndrome and mitochondrial dysfunction. - Apply learning of a structure and function of muscles cells or joints in dance form and/or sports. Discuss significant contributions of India, for example, Professor Arun Kumar Sharma for his work on chromosomes and methods for its studies

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES & ACTIVITIES
		- Recognise that the cell is a structural unit of life and functional unit of life processes. - Pose questions, such as — Can we create artificial cell which behaves exactly like a natural living cell? Exhibit creativity and design models using low cost or no-cost eco-friendly material to study structure and functions of cell and cell organelles. - Carry out an experiment to understand the osmosis. - Analyze result and present finding using scientific terms.
APRIL & MAY	Chapter 5 Exploring Mixtures and their Separation (No. of period – 12) - Homogeneous and heterogeneous mixtures; - Solutions, suspensions, colloids and their properties - Various ways to express concentration of solutions (mass by mass percentage of a solution, mass by volume percentage of a solution, volume by volume, percentage of a solution) - Separation techniques based on the physical properties of components, including crystallisation, distillation, paper chromatography, sublimation, centrifugation and coagulation	- Differentiate between homogeneous and heterogeneous mixtures on the basis of their properties. - Demonstrate separation techniques, such as crystallisation, distillation, paper chromatography, sublimation, centrifugation and coagulation. - Classify mixtures as solutions, suspensions, or colloids based on their properties. - Explain the scientific principles behind different separation techniques. - Apply the knowledge of homogeneous and heterogeneous mixtures in daily life. - Define and calculate the concentration of solutions using mass by mass percentage, mass by volume percentage, volume by volume percentage. - Analyse graphs of solubility and explain how the solubility of substances changes with temperature. - Use scientific conventions and standard units to express concentrations. - Handle common laboratory chemicals and apparatus safely. - Relate separation techniques with practices observed in the local environment. - Draw labelled diagrams or flow charts of separation techniques. Display awareness about the societal impact of chemistry in making life healthier, cleaner and sustainable. - Correlate the phenomenon used in centrifugation to the spinning dance. - Describe the cultural practices, like traditional methods of distillation. Display awareness about the contributions of Indian scientists, such as Dilip Mahalanabis. - Demonstrate the use of small-scale or micro-scale experiments, such as crystallisation of copper sulphate, as an alternative to traditional methods. - Poses question, such as — Can we create artificial blood that works just as real blood for all patients? Exhibit creativity and work collaboratively in groups to create models of apparatus used for separating mixtures, such as

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES & ACTIVITIES
		a paper Fuge and a distillation unit, using eco-friendly materials.
APRIL & MAY	Chapter 4 Describing Motion Around Us (No. of Period – 13) - Motion — displacement, velocity, acceleration - Graphical representation of motion for an object moving in a straight line in one direction (with constant velocity, and constant acceleration) - Kinematic equations for motion in a straight line with constant acceleration (by graphical method) - Elementary idea of uniform circular motion	- Differentiate between distance travelled and displacement, and speed and velocity for objects moving in a straight line. - Define displacement, velocity, acceleration, and uniform circular motion. - Express displacement, velocity, acceleration in appropriate SI units. - Plot and interpret position-time graphs and velocity time graphs to describe the motion of an object moving in a straight line in one direction (with constant velocity and constant acceleration). - Calculate average velocity from position-time graph, displacement and average acceleration from velocity-time graph. - Derive kinematic equations for motion in a straight line with constant acceleration by graphical method. - Calculate values of unknown physical quantities from the given physical quantities, using kinematic equations. - Derive the expression of speed for uniform circular motion. Analyse real-life events and phenomena and identify the key factors that influence their Behaviour.
JUNE & JULY	Chapter 3 Tissues in Action (No. of Periods – 13) - Tissues: Introduction and importance - Level of organisation in the living organisms - Plant and animal tissues - Types of plant tissues - Meristematic tissues (types and function of each) - Permanent tissues (types, structure and function of each) - Animal tissues - Overview (epithelial, connective, muscular and nervous tissues — types, structure and function of each) - Elementary idea of musculoskeletal system	- Differentiate between plant and animal tissues; meristematic and permanent tissues; simple and complex tissues; parenchyma, collenchyma and sclerenchyma; xylem and phloem; striated smooth and cardiac muscles; - Different types of joints - Relate the structure of the different types of tissues with their functions - Explain the role of various types of tissues in plants and animals - Describe the level of organisation in a multicellular organism - Establish the correlation between different tissues for fitness, for example, role of muscles, cartilage and bones in facilitating movement - Explain the importance of yoga exercises for physical agility and in maintaining the correct posture Discuss significant contributions of India, for example, Professor Sipra Guha Mukherjee and Professor S.C. Maheshwari for their significant contribution in the plant cell and tissue culture research in India. Discuss the techniques and medical recommendations in recovery from muscular injuries. - Carry out an experiment to understand the growth in plant due to apical meristem

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES & ACTIVITIES
	Care of musculoskeletal system: injuries, postural care, nutrition and exercise	- Represent data in multiple modes, including appropriate figures, tables, graphs, or digital formats, interpret and draw inferences from the data - Analyse results and present findings using scientific terms
JUNE & JULY	Chapter 8 Journey Inside the Atom (No. of Periods – 14) - Atoms are the basic units of elements - Atoms consist of subatomic particles - Atomic Models (Thomson's Model, Rutherford's Model and Bohr's Model) - Distributions of electrons in elements (up to 18 elements) - Symbols - Valency as the combining capacity - Atomic number, Mass number - Isotopes, Isobars	- Differentiate between subatomic particles (electrons, protons, and neutrons) based on their charge, and position in the atom - Illustrate how electrons are distributed in different energy levels, such as K, L, M, N ... or by numbers $n = 1, 2, 3, 4 \dots$ - Explain valence electrons, valency, atomic number, atomic mass, isotopes, and isobars - Calculate the number of electrons, protons, and neutrons of an element using its atomic and mass numbers - Interpret data, such as atomic mass, maximum number of electrons in a shell, and valency to classify elements accurately - Use scientific conventions as per international standards, such as notations for electron, proton, neutron, unified atomic mass unit (u), and distribution of electrons in various shells, such as K, L, M, N ... - Recognise and accurately apply the chemical symbols for the first eighteen elements according to IUPAC - Draw labelled diagrams of various atomic models, such as Thomson's model, Rutherford's model and Bohr's model Create and present a role play, stage play, or story of 'Journey Inside the Atom' to display awareness about the contributions of key scientists in the discovery and development of atomic structure. Display awareness about the role of Indian scientists and their contributions to atomic science for peaceful purposes and explore how their works influenced India's scientific development. Display awareness about the societal impact of science in making life healthier, like the use of various isotopes in medicines to treat different diseases, and atomic energy in power generation. Design and develop games that utilise atomic number, mass number, and subatomic particle clues to accurately predict and identify elements Display awareness about the contributions of the ancient Indian philosopher, Acharya Kanad's idea of indivisible particles (Parmanu). - Describe the use of the atomic mass unit (u) to measure the mass of atoms as per IUPAC recommendations - Describe scientific discoveries that explain how the structure of the atom has evolved over time through various atomic models proposed by different scientists

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES & ACTIVITIES
		• Pose question, such as—is it possible to completely understand everything that happens inside an atom? • Exhibit creativity and work collaboratively in groups to design different models of atoms.
JUNE & JULY	Chapter 6 How Forces Affect Motion (No. of Periods – 13) • Force; balanced and unbalanced forces • Force of friction • Newton's first law of motion • Newton's second law of motion • Newton's third law of motion	• Explain that force has magnitude as well as direction. • Identify situations in which balanced and unbalanced forces are acting on an object. • Explain the role of friction on the motion of objects. • Recognise that for an object moving with constant velocity, the net force is zero, whereas a change in velocity (acceleration) is caused by a force. • State and explain Newton's first law of motion. • State and explain Newton's second law in terms of mass and acceleration. • Calculate force using mathematical expression of Newton's second law of motion. • Define SI unit of force. • State and explain Newton's third law of motion. • Apply Newton's laws of motion to explain everyday life events. • Analyse real-life events and phenomena and identify the key factors that influence their behaviour.
AUGUST	Revision of Chapter No(s). – 2, 3, 4, 5, 6 & 8 for Half – Yearly Examination, 2026	
SEPTEMBER	Half – Yearly Examination, 2026	

NOTE:

1. The chapters/topics of Advance Science are to be taught alongwith the related chapters/topics of the book – Explorer (Science Book of Class – IX, NCERT Publication).
2. The examination of Advance Science is optional and will be conducted for the students who have opted the same.

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES
OCTOBER & NOVEMBER	Chapter 11 Reproduction: How Life Continues (No. of Periods – 13) • Introduction to different forms of reproduction — sexual and asexual, Types of asexual reproduction with examples • Sexual reproduction in flowering plants (flower	• Analyse the interactions between members of different groups of organisms, such as plants and pollinators • Compare asexual and sexual reproduction • Describe male and female reproductive organs in plants and animals • Differentiate between ovule and seed; ovary and fruit • Explain pollination and fertilisation • Explain how variations are introduced by sexual reproduction • Identify and explain the role of biotic and abiotic agents in seed dispersal and pollination

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES
	and its parts, pollination, fertilisation, seed dispersal) - Sexual reproduction in humans: male and female reproductive systems (structure and function, formation of gametes, sperm and egg, fertilisation, pregnancy and development of embryo, menstrual cycle) - Reproductive health and hygiene - Introduction to birth control methods and importance	- Illustrate the structure of male and female reproductive units or systems in plants and animals - Recognise the significance of contraceptive devices for population control and health including reproductive health Describe the contribution of India to the understanding of human anatomy. Discuss significant contributions of India, for example, Professor Panchanan Maheshwari for laying the foundation of plant cell and tissue culture research in India. Recognise the importance of improvements in medical field for assisted reproductive technologies. - Pose questions, such as—How do heavy metals harm reproductive organs? Can extreme heat affect fertility?
OCTOBER & NOVEMBER	Chapter 9 Atomic Foundations of Matter (No. of Periods – 14) - Law of conservation of mass - Law of constant proportion - Dalton's Atomic theory - Molecules of elements, Molecules of covalent compounds and their properties - Ions, Ionic compounds and their properties - Writing chemical formulae - Molecular mass - Formula unit mass	- Differentiate between chemical species based on their properties or characteristics, such as atoms and molecules, elements and compounds, ionic and covalent compounds, cations and anions, formula unit mass and molecular mass. Demonstrate activities to observe and verify the law of conservation of mass. - Explain the Dalton's atomic theory, the law of conservation of mass, the law of constant proportions, and formation of ionic and covalent compounds. - Calculate the charge on an ion, valency from the atomic number, the molecular and formula unit mass. - Use scientific conventions, symbols, and valency to write the chemical formulae of simple compounds. Display awareness about the scientific discoveries, such as the contributions of Antoine Lavoisier, Joseph Proust, and John Dalton. - Handle common laboratory chemicals and apparatus safely. - Draw diagrams of electron dot structures of atoms and molecules. - Describe how atoms and molecules can lead to beneficial applications, such as medicine, energy and peaceful use of atomic science. - Relate atomic bonding to social bonding. Design educational games to write chemical formulae using symbols. Display awareness about the contributions of Indian scientists in promoting the peaceful use of atomic energy and the traditional use of the red pigment 'cinnabar' obtained from rocks. - Describe the basic concepts that the matter are made of particles; elements combine in fixed ratios to form

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES
		compounds; the law of conservation of mass; and different types of bonding (ionic and covalent).
OCTOBER & NOVEMBER	Chapter 7 Work, Energy, and Simple Machines (No. of Periods – 13) • Concept of work; work done by a constant force • Work-Energy theorem • Mechanical energy, kinetic and potential energy, and conversion between potential energy and kinetic energy • Conservation of energy • Power • Simple machines and their mechanical advantage (pulley, inclined plane, lever)	• Define work done by a constant force and its SI unit. • Calculate work done by a force using mathematical expression. • State work-energy theorem. • Explain the concept of energy and state its SI unit. • Name forms of energy and identify their interconversion in surroundings (elementary idea). • Define kinetic energy of a moving object and derive its mathematical expression. • Define potential energy for an object raised to a height and derive its mathematical expression. • Calculate kinetic and potential energy using mathematical expressions. • Explain conversion between potential energy and kinetic energy (for the case of an object under free fall). • State the law of conservation of energy. • Define power and its unit. • Calculate power using its mathematical expression. • Identify different simple machines (pulley, inclined plane and lever). • Define mechanical advantage and calculate its value for simple machine. • Demonstrate and explain mechanical advantage of simple machines their conclusions to others.
DECEMBER	Chapter 12 Patterns in Life: Diversity and Classification (No. of Periods – 12) • Importance of classification • Five kingdoms and their key features with examples • Major division of animals and plants • Binomial nomenclature • Acellular entities: viruses	• Distinguish organisms based on certain characteristics, such as number of cells present, cellular organisation and mode of nutrition. • Classify various organisms in groups, such as five kingdoms, on the basis of their cellular organisation and ecological role. • Describe the significance and rules of binomial nomenclature. • Apply binomial nomenclature on some common organisms in their surroundings. • Analyse the interactions between members of different groups of organisms, such as lichens. • Discuss ecological role of diverse organisms. • Recognise three domains of classification of organisms on molecular basis.
DECEMBER	Chapter 13 Earth as a System: Energy, Matter, and Life (No. of Period – 12) • Earth as interconnected system	• Explain the interconnectedness between different spheres of the Earth (biosphere, geosphere, hydrosphere, cryosphere and atmosphere). • Explain the nature of solar radiation. • Explain that solar radiation is an electromagnetic wave having different Frequencies.

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES
	- Nature of solar energy: solar radiation, Electromagnetic spectrum, and speed of light - Solar energy interaction with the Earth's Surface and differential heating of the Earth (the role of the atmosphere and the Earth's surface) - Differential warming of the Earth causes winds - Biogeochemical cycles (water cycle, carbon cycle, nitrogen cycle, oxygen cycle) - Human impact on Earth's system	- Explain how heat from the Sun warms the Earth's surface differently based on the shape, latitude and tilt of the Earth. - Explain the interaction of solar radiation with the Earth's surface and relate the differential heating of the Earth's surface with the atmospheric phenomena, such as air movement, evaporation, etc., and describe phenomena like mountain, valley, sea and land breezes. - Describe how the latitude and tilt of the Earth, and absorption and reflection of solar radiation by different surfaces cause differential heating of the Earth's surface. - Identify various components of the Earth that interact with solar energy. - Explain the role of the atmosphere in influencing weather and climate on the Earth. Identify the reflectivity of different materials through reliable scientific sources, such as the internet and books. - Describe how elements like carbon, nitrogen, oxygen and water are recycled between biotic and abiotic environments. - Explain biogeochemical cycles, and the roles of biogeochemical cycles in circulating matter and energy continuously between the non-living environment (abiotic) and living (biotic) organisms, making nutrients available, and maintaining environmental balance. - Reflect the changing nature of Earth's environment through our traditional knowledge. - Pose questions, such as — What will happen if there is no differential heating of the Earth? Draw flow charts, concept maps for biogeochemical cycles, differential heating of the Earth's surface and Electromagnetic spectrum.
DECEMBER	Chapter 10, Sound Waves: Characteristics and Applications (No. of Periods – 11) - Production of sound - Propagation of sound (as a longitudinal wave through a medium) - Graphical representation of sound wave - Characteristics of sound wave (wavelength, frequency, time period, amplitude, intensity, speed) - Human perception of sound (pitch, loudness)	- Demonstrate the production of sound in multiple ways (through vibration of strings, membranes, air columns) using materials in surroundings. - Explain that sound is produced by vibrations. - Demonstrate that sound can travel through different mediums (air, solid and liquid). - Describe that sound needs a medium for propagation. - Explain that sound travels as a longitudinal wave. - Describe the characteristics of sound waves the (wavelength, frequency, time period, amplitude, intensity and speed). - Analyse graphs representing sound. - Write relationship between time period and frequency of sound wave. - Derive mathematical expression for speed of sound. - Calculate speed of sound using its mathematical expression.

MONTH	CHAPTER NO., NAME & KEY CONCEPTS	LEARNING OUTCOMES
	- Propagation of sound in different media (solid, liquid) - Reflection of sound (echo, reverberation), echolocation	- Explain human perception of sound in terms of audible range, loudness and pitch of sound. - Describe reflection of sound and apply it to echo and reverberations in surroundings. - Explain the use of sound waves for echolocation. - Describe music in terms of characteristics of sound waves, such as loudness and pitch. - Name historical buildings designed for echoes, such as whispering gallery of Gol Gumbaz. Make a presentation to demonstrate the contribution of Sir C. V. Raman in the field of Physics.
January & February	Revision of Chapter No(s). – 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 & 13 For Annual Examination	
Feb. - March	Annual Examination, 2026 - 27	

NOTE:

- The chapters/topics of Advance Science are to be taught alongwith the related chapters/topics of the book – Explorer (Science Book of Class – IX, NCERT Publication).
- The examination of Advance Science is optional and will be conducted for the students who have opted the same.

MARKS DISTRIBUTION			
Chapter No(s).	Name of Chapter	Half – Yearly Examination	Annual Examination
1	Exploration: Entering the World of Secondary Science	-	-
2	Cell: The Building Block of Life	17	6
3	Tissues in Action	15	6
4	Describing Motion Around Us	12	5
5	Exploring Mixtures and their Separation	12	8
6	How Forces Affect Motion	11	5
7	Work, Energy, and Simple Machines	-	8
8	Journey Inside the Atom	13	7
9	Atomic Foundations of Matter	-	10
10	Sound Waves: Characteristics and Applications	-	5
11	Reproduction: How Life Continues	-	10
12	Patterns in Life: Diversity and Classification	-	5
13	Earth as a System: Energy, Matter, and Life	-	5
TOTAL		80	80

Question Paper Design (Theory): Science Standard – 80 Marks

The 50% of the questions will be competency focused, such as case-based, source-based, integrated, data interpretation, situational, and application-oriented. Remaining items include select-response (MCQs) and constructed-response (short and long answer type question)

Question Paper Design (Theory): Advance Science – 25 Marks

All questions will be competency focused and MCQs.

ASSESSMENT STRUCTURE	MARKS
Half – Yearly/Annual Examination - 03 hours, For all students	80 Marks
Internal Assessment • Periodic Assessment - 05 marks + 05 marks • Subject Enrichment (Practical Work) - 05 marks • Portfolio - 05 marks	20 Marks
TOTAL:	100 Marks (Science Standard)
Additional Examination of 01 hour – FOR THE STUDENTS OPTED ADVANCE SCIENCE	25 Marks (Advance Science - Optional)

DAV PUBLIC SCHOOLS, BIHAR ZONE

Syllabus (IX), 2026 - 27: SOCIAL SCIENCE

DECLARATION

This is to certify that the Social Science syllabus plan for Class IX has been carefully designed and structured in accordance with the prescribed New NCERT curriculum (Parts 1 and 2) for the current academic session.

The syllabus has been consolidated and organized to ensure systematic and progressive coverage of all themes, excluding Theme 1, as per institutional academic requirements. The content distribution has been aligned with the school's assessment framework, including Periodic Tests, Half-Yearly, and Annual Examinations, while maintaining the integrity of the original syllabus content, concepts, and learning outcomes.

The marks mapping for both Half-Yearly and Annual Examinations has been developed on a rational and balanced basis, ensuring equitable representation of all disciplines—Geography, History, Political Science, and Economics—along with applied components. No alteration has been made to the core content; only structural organization and assessment alignment have been implemented to support effective teaching-learning processes.

This plan aims to support competency-based education, promote conceptual clarity, and facilitate meaningful assessment practices in alignment with CBSE guidelines and NEP 2020 principles. The syllabus framework is hereby approved for academic implementation for Class IX.

MONTH-WISE SECTION-BALANCED PLANNER (CLASS IX SST)

APRIL – MAY

Subject Section	Chapter	Periods	Concepts	Learning Outcomes with Activities
Geography	Shaping of Earth's Surface	8	Plate tectonics; Process of weathering and erosion, Agents of gradation, landforms and disasters	Explain processes through diagrams + 3D model ; analyze disasters via case study
History	Early Humans and Beginning of Civilization	9	The Invention of writing: Before and After, Human Ancestors, Stone Age, Ancient Civilizations	Develop timeline using timeline chart and cave art activity
Political Science	Democracy	9	Introduction, Tracing Democratic Traditions from early times, Principal of Democracy, Types of Democracy, Challenges to Democratic Practices in India.	Understand democracy via debate + case discussion
Economics	Building Blocks in Economics- The problem of choice.	7	Choices and Limited Resources, Key questions in economics, Economic Systems and How choices are Made.	Apply decision-making through choice-based exercises

JUNE – JULY

Subject Section	Chapter	Periods	Concepts	Learning Outcomes with Activities
Geography	Atmosphere and Climate	7	Composition and structure of Atmosphere, Weather and Climate, Monsoon, Climate change	Analyze climate using weather charts + graphs
History	State and Society (upto 1000 CE)	9	Understanding Early Indian State and Society, Duties and Ideals of the King, Ethics- The foundation of law and Life, Family and Society, Economy	Interpret society through map work + role play

Subject Section	Chapter	Periods	Concepts	Learning Outcomes with Activities
Political Science	Elections	9	Why does election matter? Election Commission of India, Political Parties Challenges to Free and Fair Election.	Demonstrate process via mock election + flowchart
Economics	The Price Puzzle: What Derives the Market	8	Demand, Supply, Market Equilibrium, Role of government in economy.	Understand market via simulation + graph plotting

AUGUST – SEPTEMBER

COMPETENCY DISTRIBUTION (Half Yearly & Annual)

Level	Weight
Remembering	25%
Understanding	30%
Application	25%
Analysis	20%

HALF-YEARLY EXAM BLUEPRINT (80 MARKS)

SECTION-WISE DISTRIBUTION

Section	Question Type	No. of Questions	Marks per Q	Total Marks
A	MCQ	20	1	20
B	Very Short Answer	8	2	16
C	Short Answer	5	4	20
D	Long Answer	4	4	16
E	Case / Map	4	2	8

CHAPTER-WISE QUESTION DISTRIBUTION

Theme	MCQ	VSA	SA	LA	Case/Map	Total
2 – Earth's Surface	3	1	1	—	1 (Map/Diagram)	12
3 – Climate	2	1	1	—	1	10
4 – Civilization	3	2	1	1	—	14
5 – Society	3	2	1	1	—	14
6 – Democracy	4	1	1	1	1 (Case)	15
8 – Economics	5	1	—	1	1 (Case)	15
